***Detailed Action***

***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 23-39 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 9, and 15 of U.S. Patent No.

Art Unit: 2665

6,735,175. Although the conflicting claims are not identical, they are not patentably distinct from each other because

Regarding claims 23-39, applicant's claims 23, 31, and 37 merely broaden the scope of the patent number US 6,735,175 by eliminating the terms: "algorithms through Dual Tone Multi-Frequency commands received by a controller" in claim 1; "Dual Tone Multi-Frequency tones", and "through Dual Tone Multi-Frequency commands received by a controller" in claim 9; and "flash feature and Dual Tone Multi-Frequency commands" in claim 15 of the patent. It has been held that the omission of an element and its function is an obvious expedient if the remaining elements perform the same function before. In re Karlson, 136 USPQ 184 (CCPA). Also note Ex Parte Raine, 168 USPQ 375 (bd. App. 1969); omission of a reference element whose function is not needed would be obvious to one skilled in the art.

### ***Allowable Subject Matter***

3. Claims 24-30, 32-36, and 38-39 are objected to but would be allowable if their respective independent claims 23, 31, and 37 overcoming the nonstatutory double patenting rejection set forth above.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Scoggins et al. (US 6,832,254); Caugherty (US 6,597,702); Shmulevich et al. (US 6,515,985) are cited to show changing quality of service for voice over IP calls, which is considered pertinent to the claimed invention.
